

H92

Regional Drive

The Hawkinson H92 design is a popular drive axle tread for regional line haulers. H92 is engineered to resist irregular wear and maximize mileage.

Special Features

- Increased traction for all weather conditions
- Self-cleaning grooves
- Tread depth is 24/32

Retreading is essential for the environment, there are 300 million tires currently stockpiled, and 281 million tires generated annually. Coupled with the fact it requires 22 gallons of oil to manufacture a new truck tire versus 7 gallons of oil to retread a truck tire, Hawkinson is continuing to **“Go the Extra Mile”** for you and the environment... **one retread at a time!**
